UGRAD Scholar Spring 2025 @NDSU | Web Developer | Technical Writer | CS Student | Learning to Code

Vehari, Punjab, Pakistan

Summary

I'm a junior Computer Science student with freelance experience in writing for tech businesses, marketing firms, and bloggers. I have programming experience with languages like Python and C++, working with generative AI, and building web apps using various frameworks.

I'm honored to be a UGRAD scholar, selected among the top 0.003% of students from the 2024 Undergraduate Cultural Exchange Program. This experience has allowed me to explore the US, broaden my perspectives, and refine my communication skills. Attending local events in Fargo and NDSU has become one of my favorite hobbies. Business talks attract me, and having conversations with business people is something I could do for a lifetime.

I really enjoy working on my communication skills and strive to improve them as much as I can. I love teaching and breaking down complex concepts into an easy-to-understand format. I'm currently learning Machine Learning and Web Development (Angular and Django). I'm open to connecting with people who are learning or working in the AI or web domain. I'm also open to helping students learn English and crack English proficiency exams like Duolingo.

If you're someone who's passionate about business, building real stuff with AI, or need some help in improving your communication skills, let's connect and have a chat!

Experience

North Dakota State University

Computer Science Student

January 2025 - Present (5 months)

Fargo, North Dakota, United States

I am currently pursuing Computer Science at North Dakota State University, where I am immersed in a holistic learning experience that combines technical expertise, cultural engagement, and community service.

Academic Journey:

This spring semester, I am exploring a range of subjects that challenge and inspire me:

Computer Science 425 (Machine Learning): Delving into algorithms, data-driven modeling, and the foundational principles of AI to solve complex, real-world problems.

Mathematics 105 (Trigonometry): Strengthening my mathematical skills with a focus on trigonometric functions and their practical applications in computer science and beyond.

History 104: Understanding the broader historical context of societal changes to enhance critical thinking and global awareness.

Communication 110: Honing public speaking and collaboration skills, crucial for effective teamwork and leadership in the tech industry.

Cultural Engagement and Community Impact:

Beyond academics, I am actively contributing to and learning from the vibrant community:

20 Hours of Community Service: Committed to giving back through impactful volunteering initiatives, building connections, and fostering empathy.

Digital Cultural Passport Responsibilities: Representing diverse perspectives and engaging with digital platforms to document and share cultural experiences.

Cultural Presentations: Sharing the richness of my culture with others, promoting mutual understanding, and building cross-cultural bridges.

A Holistic Vision:

This dynamic blend of academics, community involvement, and cultural exchange is shaping me into a well-rounded individual, equipped to tackle interdisciplinary challenges while fostering meaningful global connections.

iCodeGuru

DSA/LeetCode Trainer

June 2024 - August 2024 (3 months)

In this DSA session, we will cover:

~More than 25 hand picked LeetCode problems on each data structure for beginners

- ~Problem-solving techniques and best practices for efficient coding
- ~Explanation of DSA concepts in easy-to-understand format

Self Employed

Blog Writer and Copywriter

October 2023 - January 2024 (4 months)

Remote

Content Writing Facebook Groups

Content Writer

January 2022 - January 2023 (1 year 1 month)

Remote Based

I worked on Multiple niches for more than 50 Clients on Facebook over a span of one year. From Educational content to Tech Blogs and Guides, I've provided content in versatile niches.

Education

Government College University, Faisalabad

Bachelor's degree, Computer Science · (2022 - 2026)
